Art Proofs

To ensure accuracy of production, proofs will be emailed for all orders at no charge. Guarantee

Sterling Cut Glass guarantees all workmanship to be first quality. Because most of our offerings are hand crafted, it is natural for small air bubbles, chill marks and flow lines to appear. These unique variations are not considered defects. We make every effort to select pieces which demonstrate the finest representation of the craft, and to minimize any appearance of these characteristics in or around the etching area. Returns cannot be accepted without prior written authorization.

International Shipments

A shipping account number is required for all international shipments. A handling charge of \$17 (net) will apply per each international destination. Phone numbers and email addresses are required; call customer service for our required template. PRODUCT CARE INSTRUCTIONS

Due to the delicate nature of glass and crystal, hand washing is recommended. Dry with a lint-free cloth to prevent scratching. To avoid breakage, do not expose glass or crystal to extreme temperatures or to abrupt temperature changes.

Glass

The process of glassmaking has remained essentially the same since ancient times. Most glass is a mixture of silica, obtained from beds of fine sand or from pulverized sandstone, an alkali to lower the melting point, usually a form of soda or potash for finer glass, lime as a stabilizer and cullet (waste glass to assist in melting the mixture).

The materials are fused at high temperatures in seasoned kilns, boiled down, skimmed, and cooled several hundreds of degrees.

The molten glass is ladled or poured into molds and pressed or blown (sometimes into molds). The shaped glass is annealed to relieve stresses caused by manipulation, then is slowly cooled.

Non-Lead Crystal/Crystalline

Non-lead crystal is glass with a high content of potash, yielding weight, clarity and sparkle without adding lead content.

Lead Crystal

The addition of lead to the glassmaking process yields a product with increased luster, clarity and weight. It is also a slightly softer material than glass, which lends itself well to hand cutting and polishing. Leaded crystal varies in lead composition, but to be considered full lead crystal, the lead content must be 24% or higher. The higher the lead content, the more sparkle is achieved, but more skill is required to form a shape at the blowing stage.

PROP 65 WARNING

Consuming foods or beverages that have been kept or served in leaded crystal products or handling products made of leaded crystal will expose you to lead – a chemical known to the state of California to cause birth defects or other reproductive harm.

Starfire Crystal

Starfire crystal is a lead-free, low iron product that presents high clarity resembling that of optical crystal, but at lower cost. Highly polished, this material produces a bright white sparkle and is therefore sometimes referred to as “white glass”.

Cased Crystal

A unique artistic technique where clear crystal is permanently encased in a translucent layer of richly colored crystal.

Pewter

Pewter is a metal alloy consisting primarily of tin. Pewter does not tarnish. Always wash pewter products by hand in warm soapy water and dry with a soft cotton towel. Pewter products are all hand crafted and are food safe, containing no lead.

Sand Cast Aluminum

Sterling’s aluminum products are food safe. Each piece is sand cast and polished from a metal alloy consisting mostly of aluminum. Slight variations in finish and surface texture are the result of this handmade process, and are considered intrinsic to their unique design. The acids in certain foods may cause discoloration. A light coating of vegetable oil prior to use can help prevent this. If polishing or extra cleaning becomes necessary, apply a non-abrasive metal polish and gently buff with a soft cotton cloth.

Silver-Plated

Silver-plated products are genuine silver, plated over brass. Silver plated products are all lead-free and food safe. All silver will tarnish over time, particularly in humid conditions. If polishing is necessary, use a silver polishing compound and gently buff the surface with a soft cotton cloth so as not to erode or scratch plating.

Nickel-Plated

Nickel-plated products are genuine nickel, plated over brass. This durable finish is highly tarnish resistant. To clean, gently buff the surface with a soft cotton cloth.

Copper-Plated

Copper-plated products are genuine copper, plated over brass. This durable finish is tarnish resistant. To clean, gently buff the surface with a soft cotton cloth.

Antiqued Brass

Antiqued brass products are brass-plated with a layer of antique finish and lacquer-sealed. This durable finish is tarnish-resistant. To clean, gently buff the surface with a soft cloth.

Acacia Wood

Acacia wood products are handcrafted from acacia wood, a sustainable hardwood grown and replanted in Thailand. Food safe. Hand clean with a damp cloth. Wood is a natural material with varying color and grain direction resulting in variations of color within each board. Each board is unique and variations in color will occur during the engraving process.

Bamboo Wood

Bamboo wood products are handcrafted from bamboo, a durable stalk fiber sustainably harvested from China. Food safe. Hand wash in soap and warm water. Towel dry or air dry on edge. Wood is a natural material with varying color and grain direction resulting in variations of color within each board. Each board is unique and variations in color will occur during the engraving process.

Leatherette

Our leatherette collection features soft faux leather products with distinctive colors revealed beneath the surface when engraved for maximum logo presentation.

DEEP ETCH *OUR FINEST QUALITY ETCHING TECHNIQUE*

Deep etch is our highest caliber etching technique, providing the ultimate appearance in etched crystal. Your crest or logo is crisply cut, rendering a detailed and permanent dimensional image.

Please note: Etching will appear deeper in bold, open areas of a logo and less deep in fine, detailed areas such as copy.

LIGHT ETCH *WHEN BUDGET IS PARAMOUNT*

Light etch is a delicate but permanent surface etch. As illustrated, the light etch technique does necessitate small breaks in any enclosed letter or area. When budgetary concerns are paramount, light etching provides a quality, yet economical solution.

Items ordered in light etch require a minimum quantity of 72 pieces of that item with the same copy. AWARD COPY AND PERSONALIZATIONS ARE NOT AVAILABLE IN LIGHT ETCH.

COLORMARK *CREATE UNIQUE AWARDS WITH COLOR*

The UV printing process allows for printing on almost any flat object or surface, which lends itself well to glass, crystal & metal finishes. Printing with UV allows for any logo or text to be printed without limitations, producing unique and colorful awards and gifts.

ENGRAVING *IDEAL FOR ENGRAVING METAL TROPHIES, GIFTS & AWARDS*

Diamond engraving uses a non-rotating tool with a cone-shaped diamond tip, which is dragged with pressure through metal, leaving a beautiful impression. Diamond-drag creates quality engraving that compares to hand engraving. The width of stroke is constant and does not vary in depth.

Diamond-drag is recommended for soft metals such as silver, copper, pewter, aluminum and nickel.

LEATHERETTE

COATED STEEL

WOOD

REVERSE ENGRAVING

LASER ENGRAVING

Laser engraving creates a digital "burned" image from a directed laser beam, which vaporizes the substrate material. The resulting image is detailed, permanent and indelible.

**Wood is a natural material with varying color and grain direction resulting in variations of color within each board. Each board is unique and variations in color will occur during the engraving process.*

BOTTOMS UP ETCHING

Much of our barware is available for etching on the bottom of the glass.* This method of decorating offers a subtle approach to promoting your logo or brand. Contact your sales representative for details.

**While some barware is ideal for bottom etching, some selections have watermarks or imperfections not suitable for bottom etching.*

STEM FOOT ETCHING

Much of our stemware collection is available for etching on the base of the stem's foot. This decoration method offers a more subtle approach to promoting your logo or brand. Contact your sales representative for details.
